

## HID Prox and iClass now available on Evolis Pebble card printers

*Evolis – Product Marketing – EBD – APRIL 20<sup>th</sup>, 2006*

Evolis and the US company DigiOn24 settle a partnership to provide the market with an HID iClass and HID Prox solution for the Pebble users.

HID is one of world leader in the RFID market, being a pioneer with its 125 Khz legacy offer: HID Prox

In the last years, HID decided to move to a new technology and introduced the HID iClass set of products based on the 13,56 Mhz chips.

DigiOn24's core activity consists on offering upgrade solutions to card printers based on the HID Prox & iClass standards.

Available now for Pebble, the offer from DigiOn24 covers a wide range of applications:

PRODUCT CODE	DESCRIPTION	END USER PRICE (€)
D24-PEB-PRX-001	<b>HID Prox. (125 Khz) Decoder Kit</b> D24 controller PCBA HID antenna module Mounting kit	420 €
D24-PEB-ICL-001	<b>HID iClass (13,56 Mhz) Encoder Kit</b> D24 controller PCBA iClass antenna module Mounting kit	505 €
D24-PEB-MIF-001	<b>Mifare, ISO 14443 A (13,56 Mhz) Encoder Kit</b> D24 controller PCBA Mifare antenna module Mounting kit	420 €

*All those products can be mounted into the Evolis Pebble within a few minutes.*

*Assembly instructions are delivered together with the kits.*

*Connecting a DigiOn24 product requires a RS232 port on your computer*

### **Order, Delivery & Support**

Evolis Business Partner are kindly invited to contact DigiOn24 representative to order products. Evolis will not sell those kits except in the case of a large volume project where factory integration would be required.

DigiOn24 representative will also support the Evolis Business Partners in their day-to-day questions about the DigiOn24 offer.

For Europe, Middle East, Africa, Asia and Pacific, you should contact:

**Marcel OOSTERHOF**  
General Manager

**Exchange IT**  
PO Box 2148

Phone : +31 (0)172 - 520 548  
Mobile : +31 (0)6 - 1312 0776  
Fax : +31 (0)172 - 413 746  
e-mail : m.oosterhof@exchangeit.nl

### **Additional Services**

Marcel and his team will also be pleased to propose you Consulting, SW development as well as Integration Resources for all your projects.

Don't hesitate to come to him for more details.

### **Evolis Warranty**

The integration process of those modules has been realized in partnership with Evolis and DigiOn24. The Evolis R&D has agreed that such an upgrade was compatible with the Evolis quality chart, and therefore would not create any issue with the Pebble printer.

Therefore, as long as the integration is performed in accordance with the upgrade instructions, the Pebble warranty remains valid.

### **Special case of a Pebble Smart upgrade**

The DigiOn24 modules will connect through a DB9 connector. In case you want to upgrade a Pebble Smart to a Pebble Smart + HID RFID features, it is required to contact Evolis.

Your Pebble is equipped with only one DB9 slot and in that special case, a second one is required. Evolis will check with you the best solution to perform this upgrade to DigiOn24 technology.
